Spa-Tucci's Announces Professional Tanning Service with Special Bargains for Spring Customers

Mohegan Lake, NY, Apr. 6, '07 — Spa-Tucci's (www.spatuccis.com), a full-service day spa combining traditional services such as massage, body treatments and skin care with the latest health techniques including metabolic typing and colonics, today announced the beginning of its second season using the SunFX professional tanning service. To kick off the spring season, Spa-Tucci's is providing several packages combining SunFX with complimentary options.

SunFX offers unique benefits compared to other tanning systems. It uses a temporary, odorless, non-staining dye and is completely organic, consisting of bronzer, sugar, salt and water. The solution is applied by an airbrush system to prevent streaking and the unnatural orange tint typical for other products. It adapts to the customer's natural pigmentation, and one application lasts up to ten days.

Sandy Santucci, owner of Spa-Tucci's, said, "SunFX is an amazing tanning system. You see the difference as soon as it goes on, and as the day goes by, you get darker according to your natural skin color. After six to eight hours, you shower; all the residue washes off, and you have a beautiful, even, golden tan."

Spa-Tucci's is offering several tanning packages to encourage its customers. All SunFX users will receive a free manicure; purchasers of three tanning sessions will get a pedicure as well; and the

(more)

package of six comes with a free mini-facial. Many customers come in for a facial, manicure and pedicure, and then end with a tanning session.

The process uses an airbrush machine to apply the treatment. The customer stands in an application tent and is sprayed by the tanning solution mixed with air. As the solution is applied sequentially to different body areas, previously treated sections are dried by a fan. So when the application is complete, the customer only needs to wait an additional five minutes. The entire procedure takes a quarter of an hour.

Spa-Tucci's has treated over 150 people since starting SunFX last year. The product is available in lite, medium or dark depending on a person's complexion, and a special touch-up spray is provided for the face, hands and feet. Off-site tanning parties are available for groups of four or more.

Santucci concluded, "People have used SunFX for all sorts of reasons. The treatment has been used before or after going to the beach or on vacation, or for any special event. In fact, our special wedding packages for June nuptials will be starting soon."

More about Spa-Tucci's

Spa-Tucci's is a full-service day spa combining traditional services such as massage, body treatments and skin care with the latest health techniques including metabolic typing and colonics.

It offers Swedish, deep tissue and hot stone massages with powerful relaxation techniques to soothe muscles, relieve stress and restore energy. Body treatments such as crystal salt treatment/sugar scrubs, Southwestern mud wraps and firming techniques detoxify, reduce cellulite and revitalize the customer from head to foot. Skin care is provided through professional peel, collagen masks, vitamin C applications and anti-aging eye treatment. Special offerings are available for gentlemen and teens.

Spa-Tucci's is rapidly becoming famous for its unique health-related services. These include metabolic typing, colonics and ion foot detox:

-- Metabolic typing uses a scientific approach to analyze the customer's digestive system and then recommend specific foods and supplements. It works by measuring 15 unique responses to a glucose potassium drink.

-- Colonics provides a gentle irrigation of the colon combined with an abdominal massage. It removes toxic waste from the body and increases absorption of nutrients.

-- Ion foot detox counteracts exposure to toxins and other pollutants in the environment. It lessens the incidence of chronic degenerative diseases and has been widely used in many ancient healing traditions.

Spa-Tucci's offers all its services in its own beautiful chalet. Indian decorations -- the owner is part Cherokee -- adorn the walls, and friendly staff members make the visitor feel at home. The spa attempts to provide a sanctuary from the cares and concerns of everyday life.
